

ESS Clean 2022 Safety Week! June 19th-25th

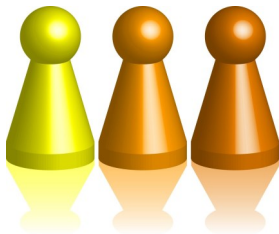

It's better to be Safe than Sorry when it pertains to Safety!

At ESS Clean our Mission is to "Create Clean, Safe and Healthy Workplaces for our Clients and Growth Opportunities for our Team"

*Please review the following Safety topics and then complete the quiz.
Your participation is mandatory.*

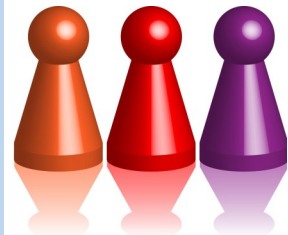

*****Reporting injuries on time*****

At ESS Clean your safety is extremely important to us. We never want you to hurt yourself or someone else on the job. If you are ever injured on the job, report it to your manager immediately. Even if you don't think it serious enough to be seen by a doctor, we still need you to report it immediately so we can collect the facts and details. If you see anyone hurt themselves on your cleaning (ex. Someone slips on a wet floor or trips over your vacuum cord) always report it, no matter how small.

*****Dwell time*****

Dwell time is the amount of time disinfectants must remain WET on the surface to kill germs such as Covid. Each different cleaner we use has a different dwell time. For example, Oxiver has a 1-minute dwell time and Virex has a 10-minute dwell time. Always make sure you know which product you are using and how long the hard surfaces must stay wet.

*****Wet floor signs*****

Always use a wet floor sign when the floor is wet. This may be when you are mopping or it may be when you discover water on the floor. One example of this would be water splattered on the floor from a water fountain. Some employees think if they are in the building alone, a wet floor sign is not necessary. This is not true. You never know when someone may have to come back into the building or perhaps you didn't notice someone working late. Better to be safe than sorry!

ESS Clean

2022 Safety Week!

June 19th-25th

****Stairwell Safety****

Cleaning a stairwell could present a hazard if you are not careful. When cleaning a stairwell, keep it clear of tools or equipment. Even a spray bottle on the stairs could cause someone to fall. When vacuuming stairs, start at the bottom and work up. When mopping, start at the top and work down. Always be aware of where the last step is so you don't fall. Always use your wet floor sign when mopping stairs.

****Trash Removal****

Never put your hands in the trash container. If you need to push down your trash, use a smaller trash can or broom handle to push it down. Avoid overfilling trash bags. A rule of thumb is to only fill the bags in brute barrel half full. Never try to toss the trash into the dumpster while holding the lid open. Always place your bags on the ground and then open the bin. Pick up and toss your bags with both hands. Remember - 'when in doubt, don't throw it out!'

PLEASE NOTE: Participation in the Safety Week Quiz is MANDATORY, so don't delay!
To be included in the drawing for one of the \$250 prizes you must have the 2022 Safety Week Quiz completed before midnight on Saturday, June 25th with a score of 80% or better.

2022 Safety Week Quiz

Name: _____
